

2024 CSC493 – Capstone Weekly Reports¹

Your name: Stevenson Michel

Select Report Date: Nov 25, 2024

Part 1: Weekly Progress Report

- **Accomplishments:** What did you accomplish since the last class meeting? (*up to 3 points*)

Last week, I got to work on the Overview page, which is the landing page that gives insights on the buckets as well as expenses and notifications. From a UI perspective, I am almost done, while I still have certain features such as graphing to incorporate.

- **Challenges:** What are your current roadblocks? (*up to 3 points*)

One thing that I am currently struggling with is the default route for my application. For example, when somebody is logged out due to the fact that the authentication has expired, it should redirect the user to the landing page. One more problem that I am facing is the fact that the refresh does not work for all the pages, meaning for instance refreshing the Expenses and Buckets pages always lead to the Overview page.

- **Desired Discussion Points:** Do you have any desired discussion points that are not related to roadblocks? (*up to 2 points*)

When developing an application, at which stage do we have to consider containerization or virtualization with tools such as Docker and Kubernetes? In addition, when all the parts of the development process are complete, how do we proceed when it comes to deployment?

- **Future Goal(s):** What do you plan to accomplish before our next class meeting? These plans should be related to roadblocks or discussion points. If you plan to change direction, explain why. (*up to 2 points*)

By next class, I would hope to finish the Edit process of Bucket, Expense, as well as the update status of Notifications.

¹ Detailed Weekly Report requirements can be found here: [2024 URCPP Capstone - Using Agile and Reporting Out](#)

Part 2: Time Reporting

Make sure that as you fill out the first prompt, you include in enough detail in the summary. For example, "debugging" is vague, but "debugged function X to make sure that when user does action Y, it is called and returns the value Z" is better.

- Time Spent:** Briefly explain how much time, *outside of class*, spent on your project. If you worked on multiple components, each should get a detailed summary. Make sure to add up all the hours and minutes correctly. *Add as many rows as you need to the table below. Please do not include hours in class as part of this section. (up to 4 points)*

START	FINISH	HOURS	DETAILED SUMMARY
MM/DD HH:MM	MM/DD HH:MM		
11/23 7:00	11/23 11:00	4	Work on the Overview Page (design, planning, UI, ...)
11/24 10:00	11/24 2:00	4	Work on the Deletion process for Buckets, Expenses, and Notifications as well as status for Notifications.
	WEEKLY TOTAL	8	

- Total (Cumulative) Project Time Spent:** After the number of hours and minutes, make sure to briefly explain whether you are on track and if not, what you may need to do in order to achieve what you set out to accomplish. *(up to 2 points)*

62 hours + 8 hours = 70 hours.
I think that for the most part, I have certain adjustments to make and certain edge cases to consider. But when it comes to the core functionality of my application, these are already well implemented.

Rubric:

The following rubric will be used, but they might change as needed.

Accomplishments (3 points)

1 point for a general description of progress, 2 points for specifics on progress, 3 points for specifics AND referring to previous targets and explaining how current accomplishments build on previous ones.

Challenges (3 points)

1 point for mentioning there are roadblocks, 2 points for specifics, 3 points for specifics AND what was done already to try to overcome them.

Desired discussion points (2 points)

1 point for at least one relevant discussion point as a general question, 2 points for relevant discussion points with specifics

Future Goals (2 points)

1 point for concrete future targets (i.e. "working more on the project" is a zero, but "working on getting component X to interface with component Y" suffices), 2 points for tying in the targets with what was hopefully discussed in the meeting.

Time Spent (4 points)

1 point for including general statements of how much time was spent ("4 hours on coding"), 2 points for splitting time into specific parts ("1.5 hours on research on component X, 1 hour coding, 2.5 hours debugging"), 3 points for specific parts and details on the pieces ("1.5 hours researching Turtle interface for drawing concentric circles given inputs from the user, 1 hour coding function X that used that interface, 2.5 hours testing function X by giving it multiple values and fixing errors for values A, B, C, and D"). 1 Point for totalling the hours correctly.

What happens if your time on a task is interrupted and you don't have a concrete (or discrete) end time? In this case put the start time in, and the word "interrupted" for the end time and include the task total time. Rounding to the nearest 15 minutes is acceptable. *(This makes adding up times easier, especially when you use decimal hours, i.e. 3.75 rather than 3 hours 45 minutes.)*

Total (Cumulative) Project Time (2 points)

1 point for summing the values correctly, 2 points for the total time AND reflection on progress (you are confident to fit the target and if not, what course corrections you anticipate needing to make)
